What are MiOra's Health Projects?

MiOra's health initiatives focus on awareness: of ovarian, endometrial cancer, multiple myeloma, and clinical trials. Empowering immigrants with better health access, bridging gaps in men's health understanding, and promoting longevity. Leveraging AI to reshape patient-physician dynamics, mental health awareness, preventive measures, and policy guidance.

Closing the Disparities in Cancer Program

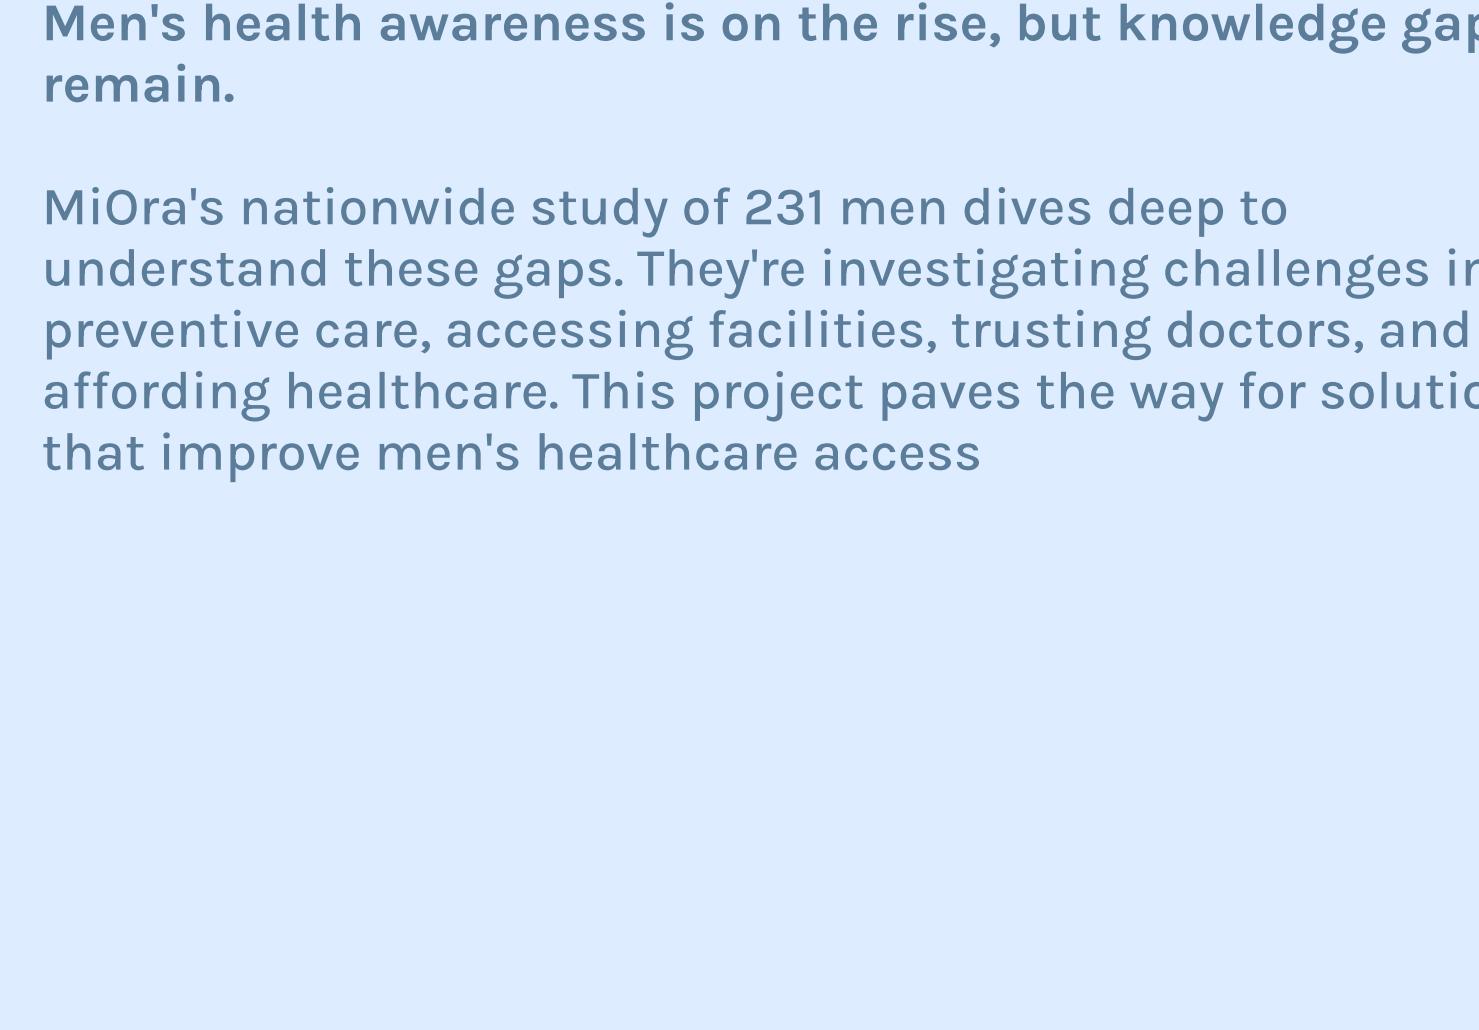

MiOra empowers communities! Our Health Ambassadors in collaboration with GSK, trained 21 CSULA students in matters related to health issues and educated 300+ in LA on ovarian & endometrial cancers, multiple myeloma, and clinical trials.

We fight disparities: research published in ASCO and a webinar by Dr. Kristin Taylor target these issues.

MiOra's Immigrant Health Literacy & Access Project

Many immigrants struggle to navigate the healthcare system. This can make their lives harder and less healthy.

MiOra's student-run project bridges the gap, listening to immigrant needs and developing solutions for better health access. Everyone deserves good healthcare, regardless of background.

Assessing US Men's Health Resource Utilization & the Associated Barriers Project

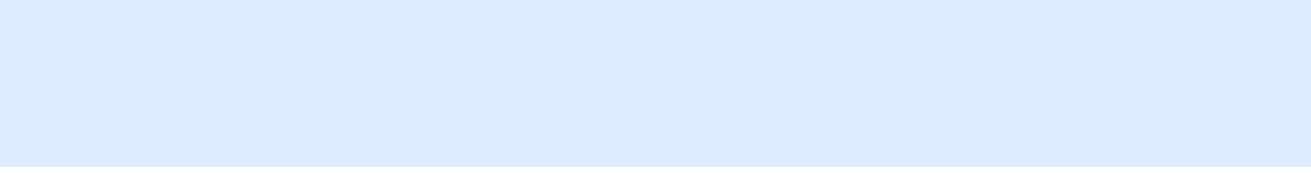

Men's health awareness is on the rise, but knowledge gaps remain.

MiOra's nationwide study of 231 men dives deep to understand these gaps. They're investigating challenges in preventive care, accessing facilities, trusting doctors, and affording healthcare. This project paves the way for solutions that improve men's healthcare access.

MiOra's AI project

Concerned about navigating healthcare? MiOra explores how AI can revolutionize access and transform patient-doctor interactions. Imagine AI streamlining appointments, simplifying information, and empowering better care.

Stay tuned for insights on how AI is shaping a healthier future!

Mental Health Project

Mental health is a global issue, impacting students greatly.

We're researching if peer-to-peer programs (students helping students) can ease stress for new college/university students. These programs leverage the power of peer comfort to provide valuable support. Our past research on trust and decision-making informs this study, with the ultimate goal of promoting student well-being.

Healthy Long-Life Project – Preventative Care

Knowledge empowers you to live your best life! Our program equips you with information on essential preventive measures - vaccines, screenings, healthy habits, and smart food choices. Make informed decisions and take control of your well-being.

Let's create a healthier future, one informed choice at a time.

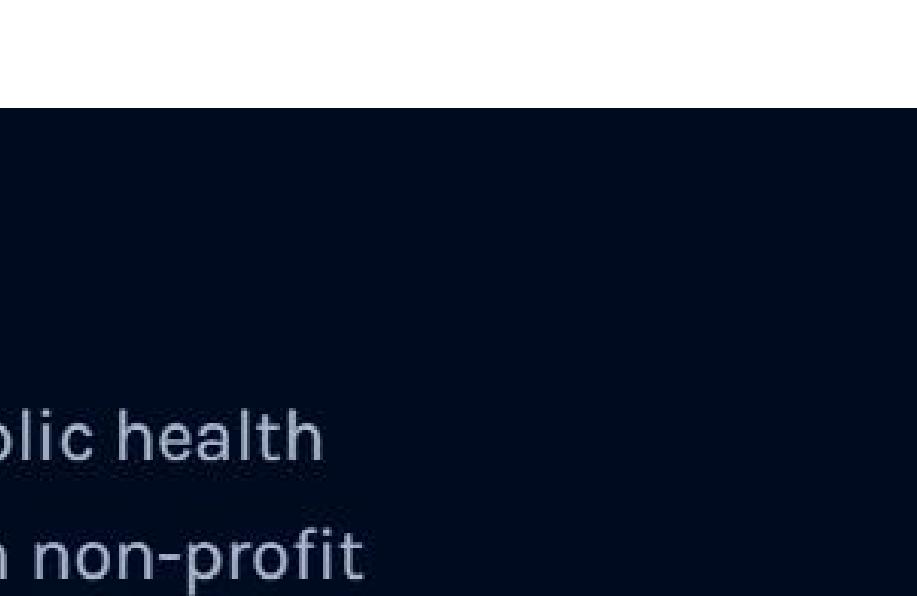

Policy Project

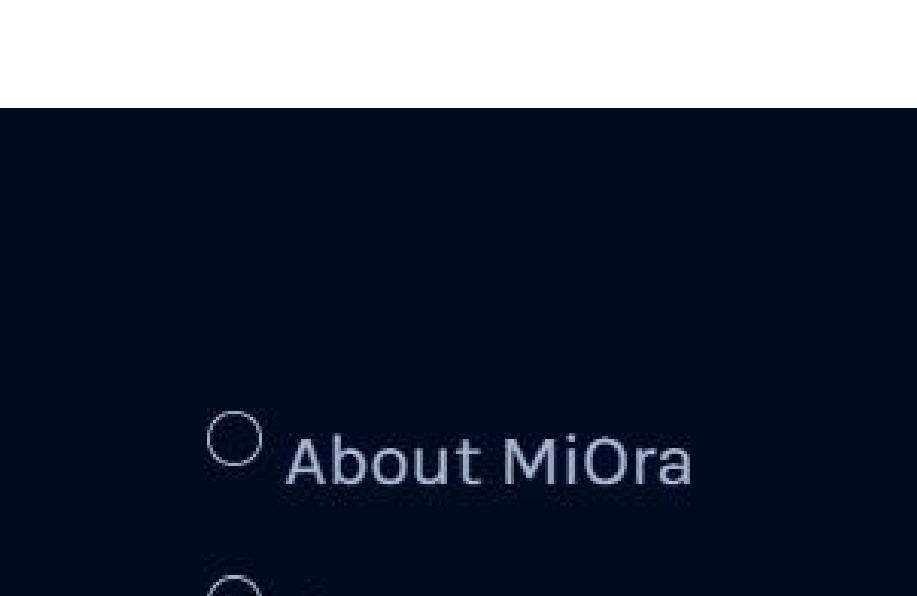

MiOra equips Health Ambassadors with the knowledge and skills to drive impactful policy change. We partner with industry leaders (like Pfizer's Norchelle M. Brown!) to offer comprehensive training.

Together, let's make a difference!

Unique Opportunities for Cutting-Edge Research

Professional Network and Educational Resources

Diverse Projects Covering Critical Health Topics

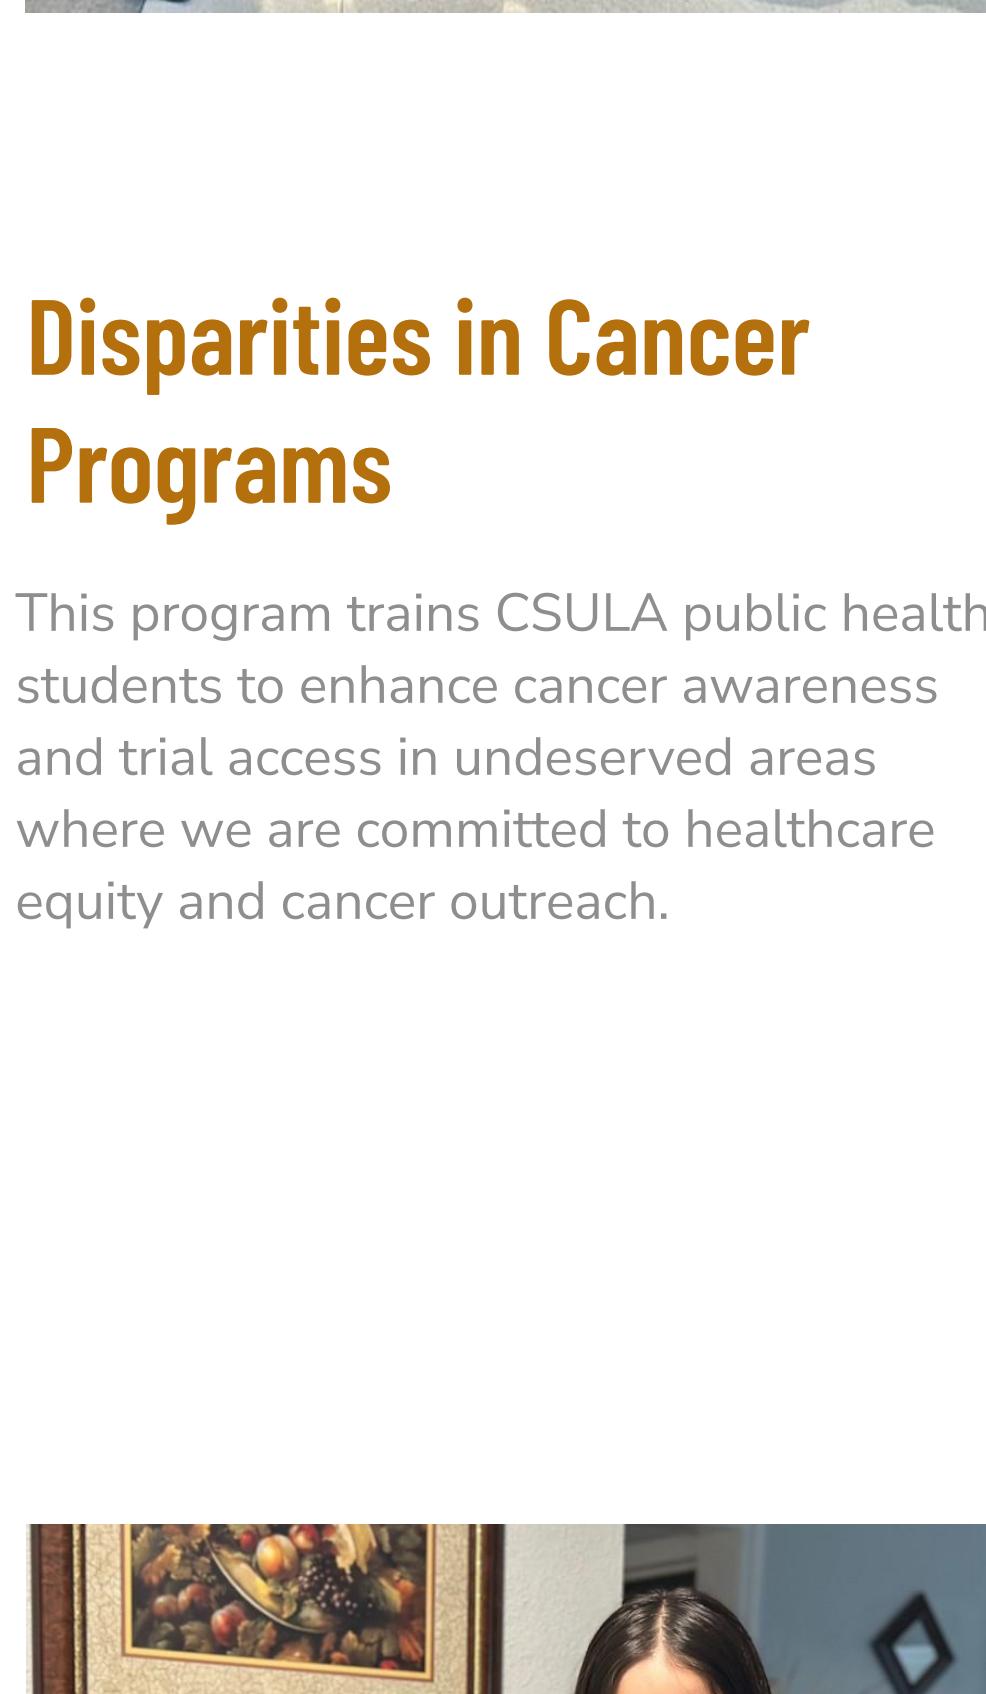

Empower, Educate, & Innovate.

Shaping the Future of Health

Driving health forward with groundbreaking research, education, and partnerships for change

About Our Projects

MiOra provides opportunities for students passionate about health and STEM to drive change in public health, from cancer awareness to vaccine advocacy, led by renowned experts.

Disparities in Cancer Programs

This program trains CSULA public health students to enhance cancer awareness and trial access in underserved areas where we are committed to healthcare equity and cancer outreach.

Immigrant, Health Literacy & Access Project

Partnering with Oakland University, MiOra's project focuses on improving healthcare understanding and access for immigrants. By assessing attitudes and behaviors and identifying barriers to access, we aim to promote health equity and inclusivity within immigrant communities.

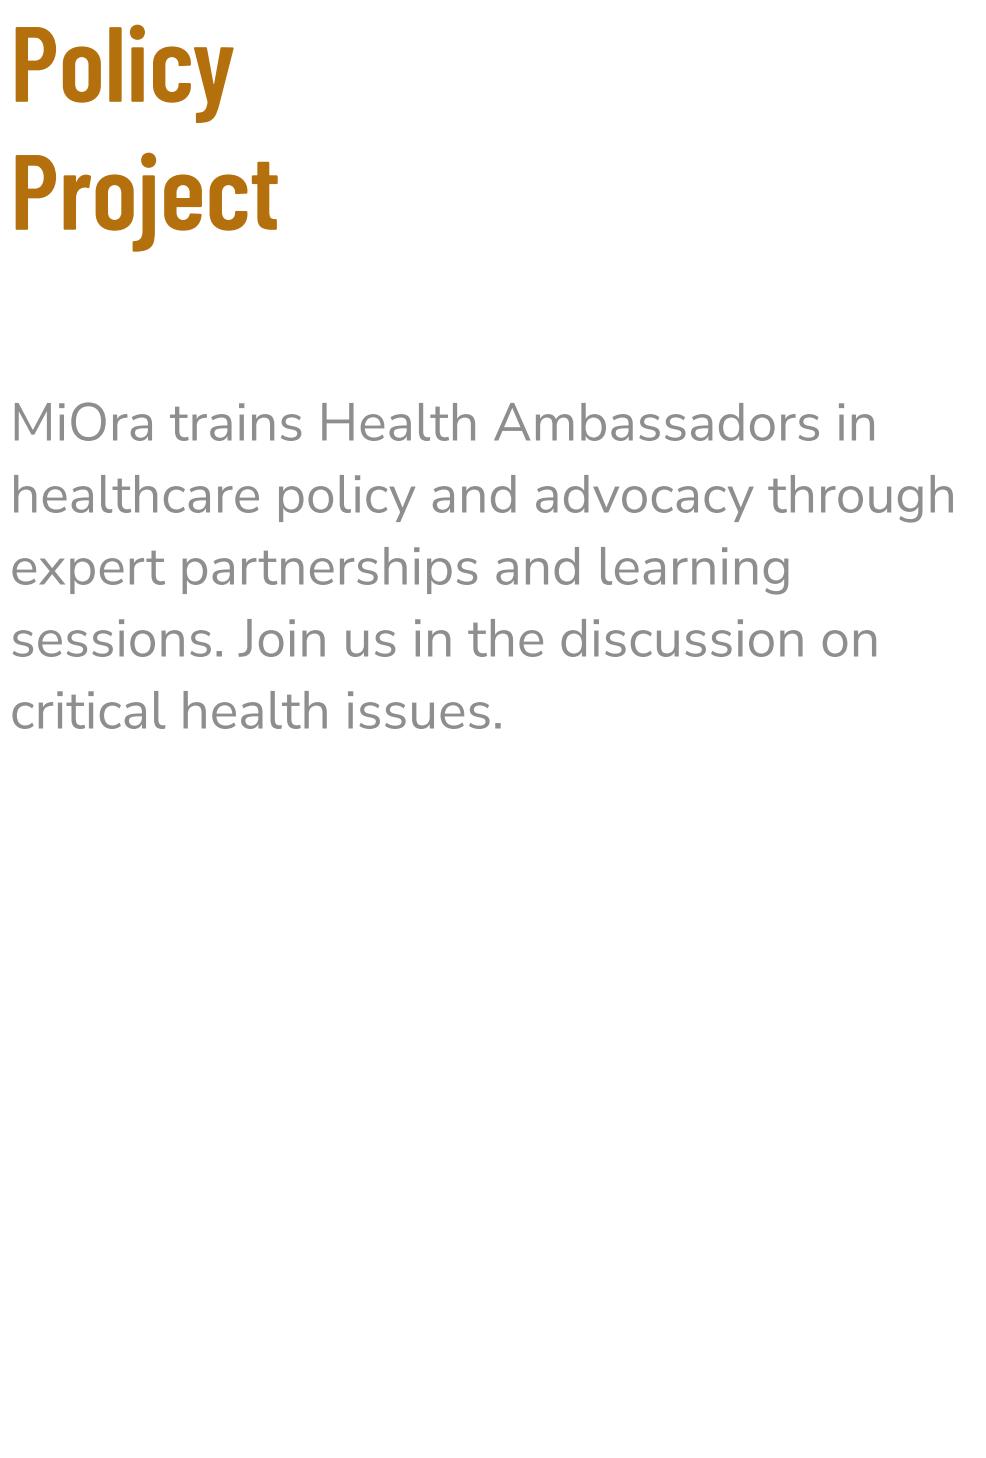

Mental Health Project

Focusing on peer-to-peer programs for stress management among students, MiOra enhances mental health support in educational settings.

AI Project

Exploring AI's impact on healthcare, MiOra aims to enhance patient care and resource allocation. By keeping up with AI advancements, we contribute to developing effective healthcare solutions.

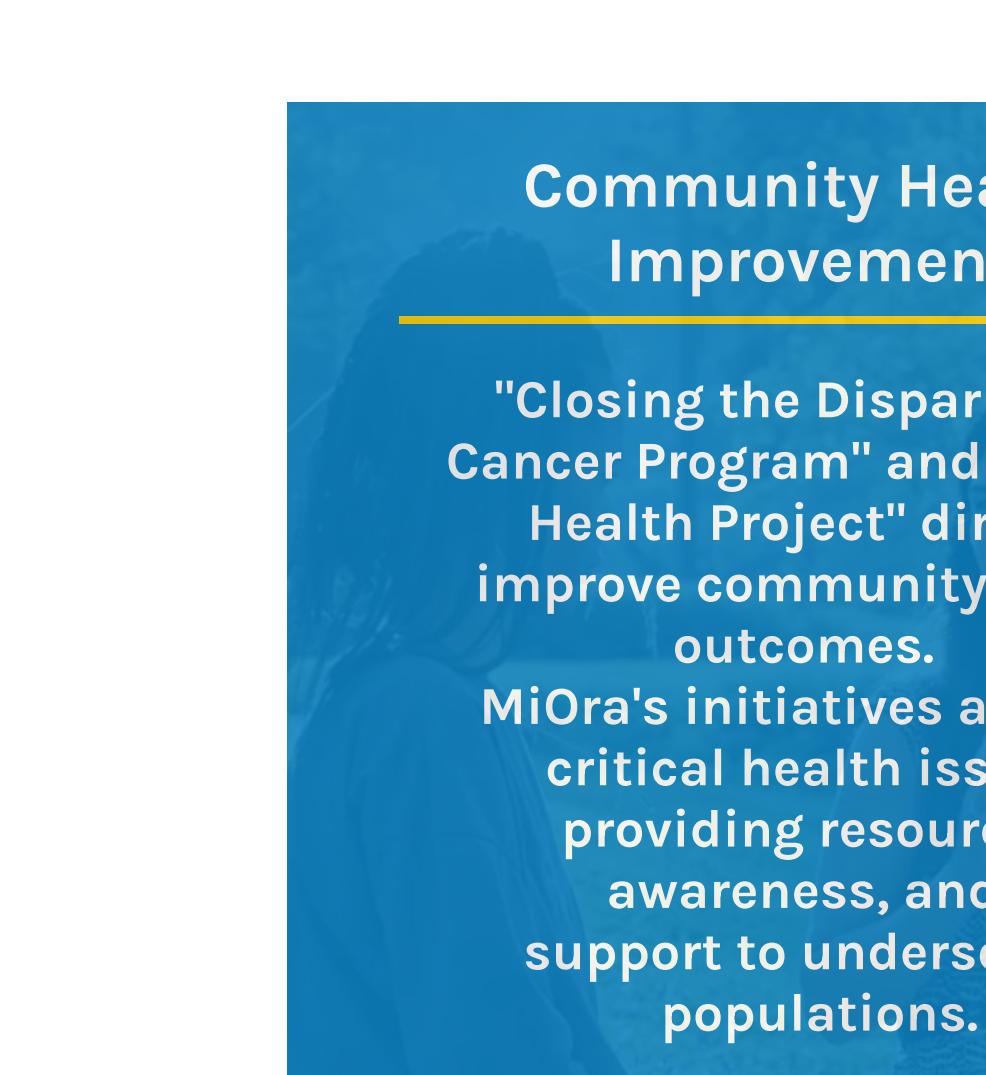

Policy Project

MiOra trains Health Ambassadors in healthcare policy and advocacy through expert partnerships and learning sessions. Join us in the discussion on critical health issues.

Healthy Long-Life Project: Preventative Care

Promoting preventative care through education on vaccines, screening tests, and healthy lifestyles, MiOra empowers individuals to take charge of their health.

OUR IMPACT

Community Health Improvement

"Closing the Disparities in Cancer Program" and "Mental Health Project" directly improve community health outcomes. MiOra's initiatives address critical health issues, providing resources, awareness, and support to underserved populations.

Policy Impact

MiOra's "Policy Project" shapes health policies. By engaging in policy initiatives, students and researchers influence the development of frameworks that can have a lasting impact on public health practices and regulations.

Innovative Solutions

MiOra's projects involve cutting-edge research, leading to creative solutions and advancements in healthcare. Whether exploring AI applications or conducting cancer research, MiOra pushes the boundaries of what is possible in healthcare.

Empowering Vulnerable Populations

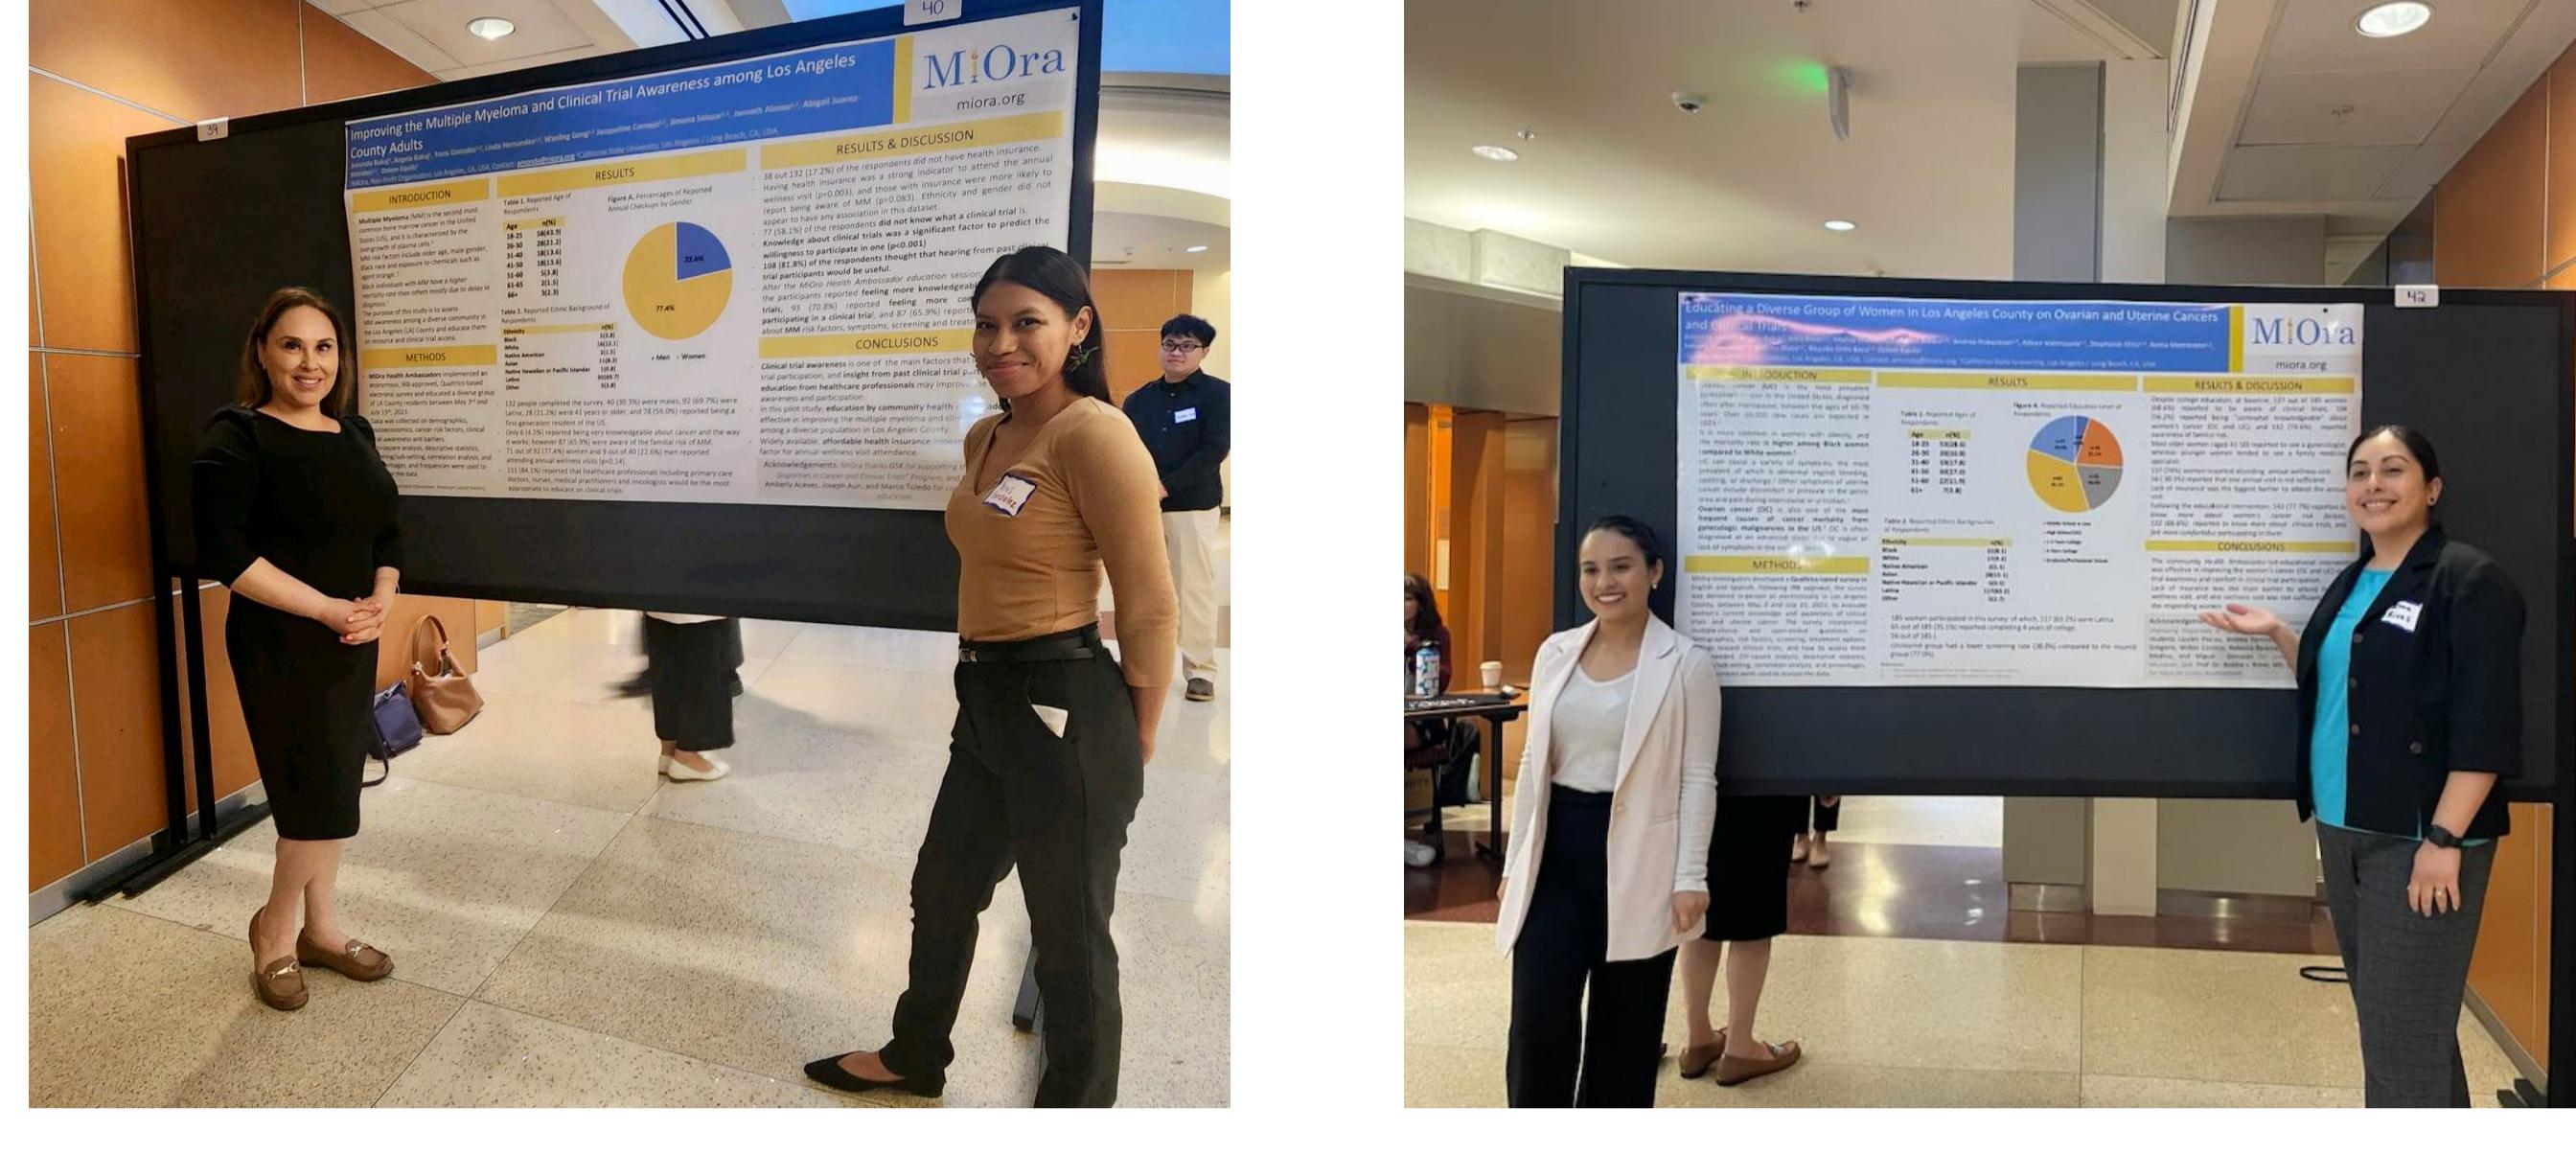

Initiatives like the "Immigrant Health Literacy & Access Project" focus on empowering vulnerable populations with the knowledge and resources needed to access healthcare services, thereby improving individual health outcomes and addressing systemic issues related to healthcare disparities.

Intern Led Projects

Our current opportunities and projects performed by MiOra interns

- Ryuichi Matsushita

Closing the disparities in cancer project

With support from GSK, 21 CSULA public health students were trained as MiOra Health Ambassadors in ovarian and endometrial cancer, multiple myeloma, and clinical trials. Over 300 diverse community members in Los Angeles County were surveyed and educated. Findings were presented at the [2023 USC School of Pharmacy Moving Targets Conference](#) in August. Two abstracts have been submitted to ASCO 2024.

Research Projects

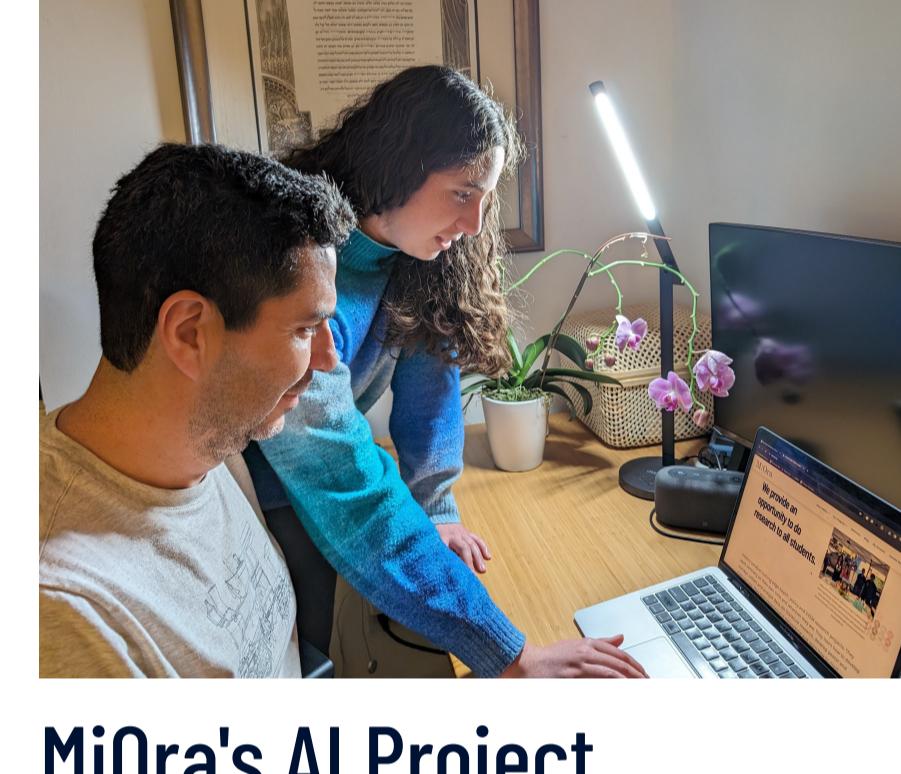

MiOra's Immigrant Health Literacy & Access Project

Oakland University Master of Public Health students are working together to better understand the attitudes, awareness, and behavior of immigrants with healthcare and healthcare utilization. The project is set to continue this year.

MiOra Mental Health Project

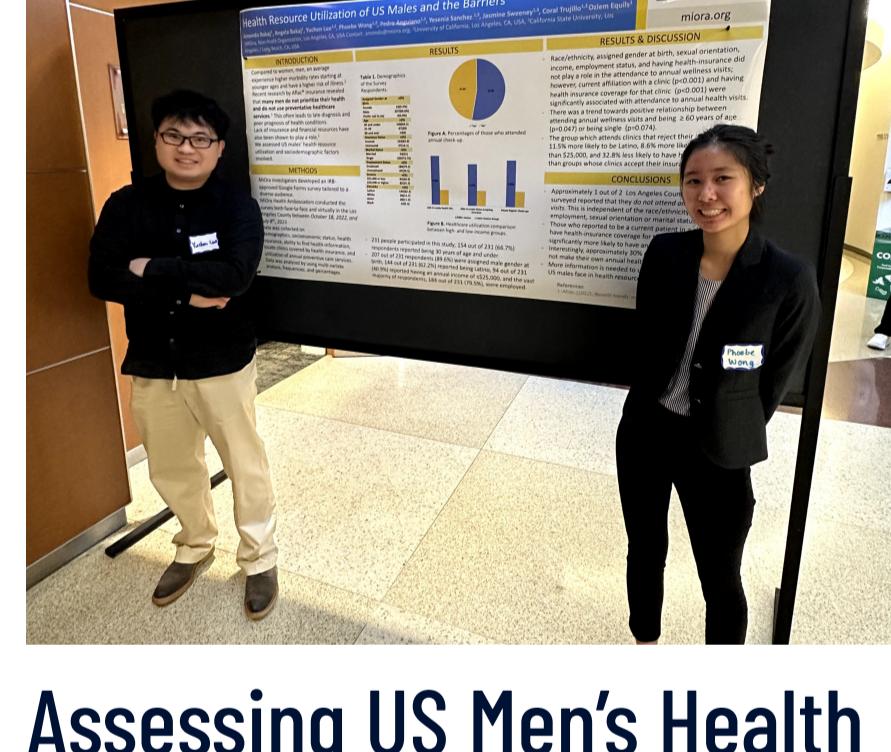

Mental health awareness has become increasingly important. Peer-to-peer programs have been established throughout the country to help many students battle the stress they are experiencing from a peer perspective.

MiOra's AI Project

With the rise of Artificial Intelligence, MiOra is working to understand the impact AI may have on healthcare access and utilization. Understanding how AI can change the dynamic between the patient and physician.

Outreach Projects

Assessing US Men's Health Resource Utilization Project

MiOra Health Ambassadors engaged with 231 men across the US to better understand their knowledge, awareness, attitudes, and behavior toward healthcare. A manuscript of the results is currently under development and will be published this year.

Healthy Long-Life Project - Preventative Care

MiOra's team is continuously working on initiatives to promote a healthy and long life. MiOra health ambassadors work to teach community members about vaccines, screening tests, healthy life styles and nutrition (for pictures, check out our Instagram).

MiOra's Policy Project

MiOra partners with experts in the field to teach our Health Ambassadors about policy and advocacy work. On March 18th 2024, Pfizer's Norchelle M. Brown will talk to MiOra Health Ambassadors about her career pathway in policy and advocacy work.

Ready to get involved?

Ready to research AI?

Have a calling for cancer research?

Whatever your passion

Make a difference with MiOra

Your future self will thank you.
